Football Helmet Face Shield Attachment Instructions

Step 1: Cut Velcro®

Cut included Velcro® to 2” strips. Use this line for measurement.

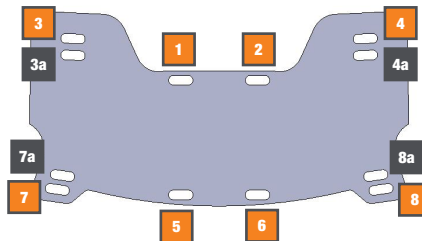

Step 2: Remove Film

Remove scratch protective film from both sides of the top and bottom shields.

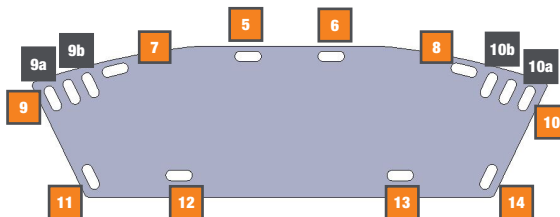

Step 3: Attach Top Shield

Attach to the inside of the face guard using the numerical order. Use the grey “a” locations as an alternative if needed. **Note that 5, 6, 7 and 8 connect to the lower shield as well.**

Step 4: Attach Bottom Shield

Attach to the inside of the face guard using the numerical order. **Note that 5, 6, 7, and 8 connect to the upper shield.** Use the grey “a” or “b” locations as an alternative if needed.

Tip: Add a drop of plain dish soap to the inside of the shields and spread with your finger to reduce fogging.
